

This is your invitation to the

# Project SENSE

**Drone  
Demo!**

**UPDATE**

**Have you heard about Project SENSE?**

**Learn more about this on-farm research project at the upcoming update session.**

*Project SENSE* (Sensors for Efficient Nitrogen Use and Stewardship of the Environment) focuses on improving the efficiency of nitrogen fertilizer use. Nebraska Extension is working directly with producers in conducting research trials on their own fields.

*Project SENSE* is a collaborative effort between the University of Nebraska-Lincoln, the Nebraska Corn Board, and five Natural Resources Districts (NRDs) in Nebraska, and producers participating in the Nebraska On-Farm Research Network.

Growers in attendance will see an applicator outfitted with crop canopy sensors, and how they can improve nitrogen use efficiency. Strategies which direct crop nitrogen status at early growth stages are a promising way to improve nitrogen fertilizer efficiency and improve groundwater nitrate levels.

**A free Noon lunch will be served. Please RSVP for meal planning purposes. Call (308) 385-6282 or email Marcia at: [lee@cpnrd.org](mailto:lee@cpnrd.org)**

**Wednesday, August 16th**

**Ken Seim Farm Chapman, NE**

**10:00 a.m. - Noon      RSVP for free lunch.**

**Directions: West of Chapman on G Road to 2nd Road (Worms Rd).**

**Go North to K Road, East 1 mile to 3rd Rd.**

**South ½ mile on west side of road.**

**University of Nebraska–Lincoln Institute of Agriculture and Natural Resources**

Extension is a Division of the Institute of Agriculture and Natural Resources at the University of Nebraska–Lincoln cooperating with the Counties and the United States Department of Agriculture. University of Nebraska–Lincoln Extension educational programs abide with the nondiscrimination policies of the University of Nebraska–Lincoln and the United States Department of Agriculture.

# N EXTENSION

Make plans to join us:  
**Wed. August 16**  
Chapman NE

Come see  
and hear how  
these high tech  
sensors work
