Land Application Training Days

February 5-27, 2019

Learn basic manure management techniques and tips to keep the environment safe and you in compliance with your NPDES permit.

Who Should Be There?

- Recently permitted operations that have not completed the initial Land Application Training should attend the all day program. Participants attending all day (approx. 6 hrs.) will receive NDEQ Land Application Training certification.
- Additional educational training is required every 5 years for permitted operations. If you are unsure of your certification status, contact Leslie Johnson (UNL, 402-584-3818) or Blythe McAfee (NDEQ, 402-471-4221). Farm representative attendance for the first 2 hours will fulfill NDEQ Land Application recertification required every 5 years for permitted operations.
- Farm staff and advisors implementing a farm’s permit or nutrient plan are welcome and encouraged to attend. Consider making this workshop part of your staff’s training.

What Does It Cost?

- All Day: \$60 per operation plus \$15 per additional operation participant(s).
- Recertification: \$30 per participant
- Fees will be due upon arrival at the location. Please do not send fees with your registration.

Where and When Can I Attend?
