PROJECT SENSE

Demonstration Days

Have you heard about PROJECT SENSE? Learn more about this on-farm research project at the upcoming demonstration days.

PROJECT SENSE (Sensors for Efficient Nitrogen Use and Stewardship of the Environment) focuses on improving the efficiency of nitrogen fertilizer use. Nebraska Extension is working directly with producers in conducting research trials on their own fields.

PROJECT SENSE is a collaborative effort between the University of Nebraska-Lincoln, the Nebraska Corn Board, and five Natural Resources Districts (NRDs) in Nebraska, and producers participating in the Nebraska On-Farm Research Network.

Growers in attendance will see a live demonstration of a group applicator outfitted with crop canopy sensors, and how they can improve nitrogen use efficiency. Strategies which direct crop nitrogen status at early growth stages are a promising way to improve nitrogen fertilizer efficiency and improve groundwater nitrate levels.

The 6 p.m. programs start with a meal/supper and the 10 a.m. demo day will conclude with a noon lunch. Please preregister 2 days in advance of each demo day for meal planning purposes. To preregister, call 402-624-8000 or e-mail christina.franklin@unl.edu.

Come see and hear how these high tech sensors work

Attend a *PROJECT SENSE* Demonstration Day near you....
