

How Much Did **YOU** Contribute?

Last year Soybean Cyst Nematodes, SCN, cost Nebraska farmers over \$45 million in lost yields. If you have SCN on your farm and are not managing it, **YOU** contributed to that loss!

Attend the SCN Management Field Day listed below to learn more about SCN and if it is cutting YOUR yields and profits!

At this field day you will be able to:

- ✓ See SCN-resistant and susceptible soybean varieties
- ✓ Examine cysts on infested soybean plant's roots
- ✓ Learn how to identify and manage SCN infestations
- ✓ Receive bags for free SCN soil analyses (\$25/bag value)
- ✓ Get answers to your questions about SCN
- ✓ Enjoy complimentary meal & visit informally with experts

Thursday, August 22, 6:30 p.m.

Matt King Farm

From Madison: Go 12 miles west on Highway 32, (4 miles east of Highway 45), 1 mile south on 541st Avenue, 0.25 mile east on 827th Road (north side)

Funding for this project was generously provided by the Nebraska Soybean Board...
your checkoff dollars at work!
