*Adjusted for 10% moisture

Site: High Plains Ag. Lab (near Sidney, NE)
Planted: 6/4/2012
Harvested: 10/15/2012
Previous crop: Wheat
Fertilizer: 30 lbs N
Herbicide: 2 Pints Prowl H2O, 2.5 oz Spartin Pre Plant
Insecticide: None

Note:
 The irrigation system (linear) broke down during seed development stage (R6-R7) and the trial could not irrigated for about 10-days. This impacted yield and test weight as seen in the result. There was significant seed weevil infestation, which has also affected the yield.
